Enterprise Project Director Senior

Summary: The Strategic Technology Solutions division within the Department of Finance & Administration is implementing a new IT delivery model for its customer agencies in a phased approach. The Enterprise IT Transformation initiative involves building a highly qualified and experienced organization to support our agencies in four business domains through a shared resource delivery model. Several critical resources are being recruited to build this delivery model to improve our IT customer service, improve strategic planning with a focus on enterprise solutions and provide improved solution delivery success rates.

The Enterprise Project Director Senior provides oversight at a statewide (enterprise) level for large software application development projects, business process re-engineering and complex change management efforts. The position will be responsible for oversight of the planning, initiating, procurement, and managing information technology (IT) projects at the Enterprise level.

The Enterprise Project Director Senior will be in a matrix reporting environment and work closely with the Business Domain or Enterprise Director or Enterprise Leadership to ensure the agency projects align with the overall Business Domain or Enterprise needs.

Required Experience:

- Requires an extensive background in managing large, complex projects with outstanding interpersonal and communication skills.
- Must demonstrate strong leadership and communication skills in working with all levels in state government and any external stakeholders.
- Experience must include scheduling, establishing level of effort, resource loading and management of the project team, comprised of technical and program staff as well as contractors from one or more firms, to complete tasks within estimated time frames and budget.
- Implement methodologies for managing and measuring the program/system development lifecycle.
- Effectively manages and monitors issues/risks. Ensures issues/risks are tracked and escalated as needed.
- Must demonstrate strong interpersonal skills with all levels of personnel and demonstrate the ability to motivate employees/teams to apply skills and techniques to solve dynamic problems.
- Must have a bachelor's degree.
- Must have at least 10 + years large, complex IT development and implementation experience.

Preferred Experience:

- 15-20 years large, complex IT development and implementation experience.

- MBA or Master's degree.
- Experience working in the governmental sector (local, state, or federal).
- Strong IT technical background.
- Experience working with Agile software development methods
- Certification in one of the following: Project Management Professional (PMP), Six Sigma, LEAN, Business Process Management.
